

BEESWAX TREE WORKS NEAR THE CRICKET PAVILION/TOP LODGE

Message from Beeswax Dyson:

We have recently been contacted by WHP telecoms who provide communication transmission function for the emergency services. They have identified that the line of site is being obstructed by trees and one of the affected areas is along the old avenue that runs from Nocton Cricket Pavilion to Top Lodge.

We have met with the tree work contractors and agreed that the identified tree will be reduced and shaped by 3 meters. I have highlighted the location below in red. This will be carried out within the next 2 – 3 months, after the necessary bird surveys have been carried out.

We thought it was important to let you know as this is located adjacent to a well walked route.
